

FACE PRC APP Professional Remote Control

The **FACE PRC Professional Remote Control APP** for installers and maintainers allows to perform the following operations in a simple and intuitive way:

- Set and modify all the functioning parameters of the automations that are connected to the **FSD5** function selector.
- Download the functioning parameters of a door and upload them on other installations that require the same operating parameters. The downloaded parameters can be sent to multiple recipients via Whatsapp or email for consultation.
- Download the diagnostic for the maintenance, read the alarms, the number of cycles performed etc. The downloaded parameters can be sent to multiple recipients via Whatsapp or email for consultation.

FACE PRC Professional Remote Control APP for ANDROID is now downloadable for free on Google Play Store. The IOS version will be available on the Apple Store starting from June 2020.
